

IFX-5500 Inlet Filter Extension Hose and Tripod Assembly

This Extension Hose and Tripod Assembly provides a safe and reliable method to extend the intake filter from the Breathing Air Pump to a clean breathable air source location. It is commonly used with Rhine Air Breathing Pumps such as the NF-1200A or NF-27. Both the extension hose and tripod are designed for quick set up and breakdown capability and can be transported easily for mobile operations.

FEATURES AND BENEFITS

- The extension hose is flexible, kink resistant and UV resistant
- Corrosion resistant metal tripod stand with adjustable telescoping legs
- Cam lock style fittings that will connect to the air pump intake manifold and inlet air filter snorkel without modification
- Center post adapter can position the air pump inlet filter snorkel in a upright position above the ground
- Quick set up and breakdown capability and can be transported easily for mobile operations

SPECIFICATIONS

Classification:	Inlet Air Filter Extension Assembly
Materials:	Hose - UV resistant, PVC suction Hose, Tripod - corrosion resistant metal
Extension Hose Length:	50 ft.
Materials:	Hose - UV resistant, PVC suction Hose, Tripod - corrosion resistant metal
Breathing Pump Compatibility:	All Rhine Air pneumatic/electric

PART #	DESCRIPTION
IFX-5500	Rhine Air Extension Hose and Tripod Assembly

Berry Compliant and Made In U.S.A.
